## ROYAL BAKING POWDER Absolutely Pure.

The powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight alum or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO., 105 Wall St., N. Y. Jy24,1v

To all whom it may Concern. I will remain in Carson with Dr. Herrick for the next 60 days for the purpose of diagnosing diseases. All prescribing and surgical operations necessary, will be done by Dr. L. A. Herrick.

J. L. Meyer, M. D.  
Chronic diseases treated by the latest methods.

Rupture radically cured.  
L. A. Herrick.  
Nov 3 rd., 60 ds.

**Syrup of Figs**  
Is Nature's true laxative. It is the most easily taken, and the most effective remedy known to cleanse the system when bilious or Costive; to dispel Headaches, Colds, and Fevers; to Cure Habitual Constipation, Indigestion, Piles, etc. Manufactured only by the California Fig Syrup Company, San Francisco, Cal. For sale by George C. Thaxter, agent Carson. jan1

In the District Court  
—OF THE—

STATE OF NEVADA,  
—IN AND FOR—

Ormsby County.  
In the matter of the estate of Herbert O. Lindsay, deceased.  
Estate of Herbert O. Lindsay, deceased—Notice is hereby given by the undersigned Administrator of the Estate of Herbert O. Lindsay, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within four months after the first publication of this notice to the said Administrator at his office at Empire City, Nevada.  
SAM LONGBAUGH,  
Administrator of the estate of Herbert O. Lindsay, deceased. nov6,nd

## ALL SORTS.

—Suits to order at A. Cohn's Emporium. o26,1m  
—T. B. Rickey was in the city yesterday.  
—Bob Christy won the \$25 keno at the Monarch.  
—P. Powers, of Reno, was in Carson on Sunday.  
—For sale.—A young fresh cow Inquire at this office. 1w.  
—Senator Gallagher was at the Arlington on Sunday.  
—Sam Dawling of Virginia City spent Sunday in Carson.  
—Mrs. Katie Corbett left on Sunday for San Francisco; also Billy Corbett.  
—The girl who so "mysteriously disappeared" in Reno has been accounted for.  
—Gen. Alexander returned home Sunday, and will leave for Genoa this morning.  
—BORN.—In this city, Nov. 25, to the wife of John M. Dormer, a son; 9 1/2 pounds.  
—Miss Mabel French who has been visiting San Francisco, returned home Sunday.  
—Mrs. A. M. Ladd mother of Mrs. Hume Yarrington left for her home in San Francisco, Sunday.  
—Gen. Irish, of Reno, and E. C. Hardy, President of the Oasis Ranch Company, were in the city Sunday.  
—Mrs. Geo. Tuffy left Sunday night for California, on a visit to her daughters, Mrs. Roberts and Mrs. Parrott.

—It is alleged that Charles Lenahan, killed by McTigue at Silver Peak, told the latter to go arm himself before the fatal shot was fired.

—The Elko Independent says Professor Bullard an alleged phrenologist, is a fraud and skipped the town without paying his advertising bills.

—Information wanted about Levi Steinhoff (nicknamed Sluicer), dead or alive. He was a miner or carpenter, and last heard of in Carson in 1862. Address D. K. Zumwalt, Visalia, Cal. tf

—Ayer's Pills are always ready for use. They are sugar-coated, easy to take, and sure to bring relief and cure. They are effectual in all diseases caused by disorders of the stomach and digestive organs.

—Do you suffer from indigestion, or loss of appetite? Are you troubled with liver or kidney complaint? Take Ayer's Sarsaparilla. This preparation purifies and vitalizes the blood, thus restoring health and strength to the digestive and assimilative organs. Try it.

—Cleveland's majority in Virginia is only 1,586. Virginia should get up a land boom and invite immigration from the North. In that way it may soon become prosperous in business and Republican in politics. Southern California has set a good example for Virginia to follow.

—Nevada hay being cured without being exposed to either rain or dew, it is said to be the best obtainable in the United States. It is regularly shipped to the Atlantic States to be used in feeding valuable racing stock. In the alfalfa hay there is so much saccharine matter that hogs eat it greedily and fatten on it as readily as on corn.

—The morn has its time for breaking.

The sun has its time to set, But the weekly shipments for Olcovich Bros.

Show no signs of abating yet.

The last load of freight consisted of Coffee, Tea, Mackarel, Raisins, Boots, Shoes, Tobacco, Brandy, and a lot of staple and fancy Dry Goods. Every line is well assorted and all goods fresh and new at Olcovich Bros.

An Old Paper.

The APPEAL is in receipt of a copy of the Carson Daily Independent of February 23, 1864, published by Israel Crawford. It was sent us by J. R. Mason and would doubtless be more interesting to many old citizens than a copy of either of the Carson papers published to-day.

It is of a pronounced yellow type and was served for 50 cents a week by carrier or \$16 per annum in advance.

## ESPERCET.

Information from the Commissioner of Agriculture.

Our exchanges have been publishing so much about the new forage plant called Espercet during the year, that we reprint the following about it from the annual report of the Commissioner of Agriculture just received: "This leguminous forage plant has recently been introduced into this country under the name of 'Espercet.' Espercet is the German name; Sainfoin is the name used in France and England. It is a perennial, having somewhat the appearance of Lucerne, but of similar size and different habit. It seldom exceeds 1 1/2 feet in height with a weak stem, rather long and pinnate leaves, and flowers of a pink color in a loose spike, 2 to 4 inches in length, raised on a long, peduncle or stalk. The flowers are succeeded by short, single seeded pods, which are strongly reticulated or marked by raised lines and depressed pits. It is a native of Central and Southern Europe and Western Asia, and in Europe has long been in cultivation. From experiments made by the Duke of Bedford in England we learn that it was first introduced to English farmers as a plant for cultivation from Flanders in France, where it has long been cultivated. It was found to be less productive than the broad-leaved clovers, but on chalky and gravelly soils there was abundant proof of the superiority of Sainfoin. It produces but little herbage the first year, but improves in quantity for several years. Mr. Martin J. Sutton, in a recent work on 'Permanent and temporary pastures,' says that it has been cultivated in England for over two hundred years. He says it is essentially a food for sheep, and in pasturing the sheep do it no injury. It is also useful for horses, but produces nothing like the quantity of green fodder that can be obtained from the Lucerne patch. When sown alone Mr. Sutton says that Sainfoin is liable to decrease and become overrun with weeds. He recommends its use as a predominant constituent in a mixture of grasses and clovers. He says that combined with strong growing grasses there is less risk and the grasses keep down the weeds which otherwise are apt to overrun the Sainfoin. In a green State it is quite free from the danger of blowing cattle (horns) and when made into hay is an admirable and nutritious food. But it requires great care in drying when made into hay. Mr. Sinclair states that the produce of Sainfoin on a clayey loam with a sandy subsoil is greater than on a sandy or gravelly soil resting upon clay. A French writer says that Sainfoin cannot accommodate itself to damp soil, and even dreads soil which, although dry, rests upon a wet subsoil. It delights in dry soil, somewhat gravelly and, above all, calcareous. It flourishes upon the declivities of hills where water cannot remain, and in light soil where its powerful root can readily penetrate. But although surviving in the poorest calcareous soil like clover and Lucerne, its productiveness is always relative to the permeability and fertility of the land. It prefers open, sunny places, with a Southern or Eastern exposure. Sainfoin has received several trials in this country, but without success, probably from the experiments having been made upon unsuitable soil. We cannot expect that it will be preferred in places where clover succeeds, but in light soils and in regions with a light rain-fall it should receive a thorough trial. A recent bulletin of the Iowa Agricultural College gives the result of some experiments with this plant which are very satisfactory. Observations there made indicate that it stands early freezing quite as well as Kentucky bluegrass. It produces at the rate of 3 tons of dry hay per acre."

Arrested for Larceny.

Mrs. Annie Daily was arrested yesterday on a charge of larceny, preferred by Mrs. Fred Turner.

It appears that Mrs. Daily had been occupying a house owned by the complaining witness, who alleges that after moving the latter appropriated a number of articles of household economy, including glassware, crockery and a kerosene lamp.

## DR. MELLISH.

Something of a Scientific Optician Now in the City.

There is now stopping in Carson a scientific optician who is a regular graduate of Dr. Bucklin's School of Optics, New York City.

He has rooms in the parlors of the Arlington House, and his patrons all agree that his knowledge of his business is of the highest order.

No optician who has ever been here has been able to display so many modern improvements in the mechanical appliances for optical work, or has made so good an impression with his patrons.

He is a modest, unassuming man, but his work speaks for himself.

A representative of the APPEAL called at his office yesterday and inspected some of his appliances. The ophthalmoscope, an invention by Helmholtz, enables the operator to explore the recesses of the eye and look directly upon the optic nerve, the only nerve in the body which can be inspected in a living person.

A case of test lenses, on exhibition is the most complete classification of test lenses ever made and arranged for the optician embracing every form of lense known to science. With its aid an expert can make any combination necessary to overcome visual defects, and have the necessary glasses tried and tested before giving them to the patient.

A very important point in the fitting of spectacles is pupillary distance that is to have the centres of the eye for distance glasses, and a little inside for reading glasses.

This is done by means of a pupillometer which gives the proper distance in millimeters and makes a pair of glasses perfect. This is a recent discovery in optics.

Many a man purchases a pair of glasses which seems all right but which cause the eye to pain him in a few months.

This is because the cones of the lenses do not come opposite the pupils of the eye.

The Doctor has at least a dozen late inventions for the perfect testing of the eye, and he has a scientific knowledge of the work which insures an intelligent treatment of the subject.

As he will only remain a week longer, persons having need of his professional services should secure them at an early date.

## Haverly's.

Today the greatest minstrel organization of the earth, fenced or unfenced, will parade the streets of Carson, and appear at the Opera House in the evening.

It is unnecessary to tell old theatre-goers what Haverly's troupe amounts to. It is as well known as the Bunker Hill Monument. There is also a specialty troupe in combination, all for one price.

## Card to the Public.

Mr. A. E. Mellish, one of the most expert and successful Opticians on the Coast, is at the Arlington House, where he can be consulted by all those suffering from defective vision. Mr. Mellish has the best and most complete apparatus on the Coast for the detection and correction of all errors of refraction. No charge made for examination and visual tests. n22 1w

## The Perfection

Of the age in the medical line is the liquid fruit remedy, Syrup of Figs, manufactured only by the California Fig Syrup Company, San Francisco, California. It is agreeable to the taste, acceptable to the stomach, harmless in its nature, painless yet prompt and thorough in its action. For sale by Geo. C. Thaxter, Agent.

## Advice to Mothers.

Mrs. Winslow's Soothing Syrup should always be used for children teething. It soothes the child, softens the gums, allays the pain, cures wind colic, and is the best remedy for diarrhoea. Twenty five cents a bottle.

## Domino Party.

The Carson Social Club will give a grand Domino Party at Armory Hall on Saturday evening December 8th 1888. Tickets admitting gentleman and ladies \$1 00.
